

U.S. Money Machine Newsletter

September 18th 2012

Welcome to the *U.S. Money Machine Newsletter*! This is an introductory newsletter that will help familiarize you with the US Money Strategies. Your *Ultra-Safe Money Strategies Manual* will outline these strategies in greater detail, so it's recommended that you read through it carefully to get the most out of each newsletter. (If you are not familiar with option investing I recommend you read *A Practical Guide to Understanding Options* Report contained in the Appendix of the *US Money Manual*. This Report was designed to teach you the basics of what you need to know to become a successful option investor.)

In the *US Money Manual* we will explore the trading strategies that have been profitable in real time trading over the past several years. In spite of the market volatility we've seen, the US Money Red, White and Blue Strategies have produced over \$2.3 million in actual profits. My goal is to provide you with the knowledge and guidance necessary to learn how to profit with stocks and options in any type of market condition.

With my 27 years of trading experience, I have learned that *it is possible to profit in volatile markets by employing spread strategies* that allow you to maintain your stock or option position during volatile price swings. My actual trade results demonstrate that spread trades can be profitable if a stock goes up, down or remains flat. This is an attractive characteristic of spread trades that we will try and take advantage of to profit in volatile market conditions.

Listed below are the *US Money Strategies* that have worked well for me over the years:

US Money Spread Strategies

- *Red Strategy*
- *White Strategy*
- *Blue Strategy*
- *Dividend Strategy*
- *Sell Weekly Option Premium to Generate Cash Income*
- *Super Portfolio Spread Strategy*
- *Market Neutral Spread Strategy*

In each weekly newsletter we will be focusing on implementing one or more of these strategies through special 'Profit Opportunities' that I will list. The overall goals of the US Money Strategies are listed below:

Overall Goal of US Money Strategies

The overall goal of the *US Money Strategies* is to:

- Profit with the *Market Neutral Strategy* regardless of market direction
- Produce consistent returns with the ultra-low risk *Red Strategy*
- Generate weekly cash income through the sale of weekly option premium
- Increase the profit potential of a stock or option trade (*White Strategy, Blue Strategy* and *Super Portfolio*)
- Provide downside protection and reduce the risk for a stock or option trade (short calls and put options profit as stock moves lower in price)
- Help you maintain a stock or option position during volatile markets and wide price swings and avoid being 'stopped out' of your position

I hope to help you achieve these goals and make you a more disciplined trader with each newsletter I release. Thank you for giving me the opportunity to help you become the successful trader you've always wanted to be, and I look forward to hearing your success stories!

Best Regards,

Chuck Hughes
